

NOLA

MOTORSPORTS PARK

In Conjunction With

EVOLUTION PERFORMANCE DRIVING SCHOOLS

PRESENT

THE EVOLUTION TEEN ACCIDENT AVOIDANCE SCHOOL

Does your teenager know what to do in a dangerous driving condition? Would you like your teen to gain experience behind the wheel to keep them safe while driving? Do you want to give your son or daughter skills that could save their life behind the wheel of a car?

Using your daily driven car, Evolution's staff of professional driving instructors helps you and your teen control a car that has been pushed beyond its normal limits. We take students through a Police style training course that will educate them on the effects of understeer and oversteer, the importance of weight transfers, establishing smooth inputs, creating a plan of action, visualization, the art of anticipation, braking and reverse driving. All these techniques will ensure your teenage stays safe on the street in any circumstance.

NOTE: All of our instruction is hands on and in a controlled environment. This program is great for parents as well and Evolution encourages parents to take the class with their teen.
